IoT Workshop

Participated in 2-day IoT Workshop organized by CSI, MEC.

PROJECTS

PlanDoc – A Plant Disease Detection System

A user-friendly webpage where users upload plant images for disease detection. Powered by Python, the system analyzes and identifies diseases, providing accurate results and actionable treatment steps.

CyberShield – A Cyberbully Detection System

A user-friendly web page where users paste YouTube links to detect cyberbullies and offensive comments. Powered by BERT for language understanding and LSTM for text classification, it analyzes comments and generates a report to address harmful behavior.

Home Security System

A system that secures our homes from theft and fire using the Vega Processor and its associated sensors like Ultrasonic Sensor, Motion Sensors, etc.

LANGUAGES KNOWN

Malayalam - Native
English - Proficient

SPECIAL INTERESTS
